

Just Thinkin' About...

By Pastor Ron Lundy

Perplexing...

I have a 2006 Ford Fusion with a stick shift. I bought it because I enjoy shifting gears, always have. Another thing my car has is a check engine light which did eventually come on, as they all do. Because I did not get it checked right away I got used to it being on.

The other day I got in my car and the dashboard looked different. Something was wrong. I finally figured out the check engine light was off. Whatever caused it to come on was no longer a problem. I was not perplexed because something was wrong; I was perplexed because something was right.

Wow! What a lesson to apply to life. Everything that is wrong about the world is completely normal to the world while people who know and love the Lord perplex the world. Jesus is going to return soon for His own. He will show us what is normal to Him, and that is all that really matters.

Speaking of which, beginning January 1st, we will be studying Revelation on Sunday nights and Genesis on Wednesday nights. Our study will begin with the rapture of the church. Join us for a time of rich discovery and good Christian fellowship.
